

SUMANTH POLISETTY

AI Engineer — Agentic Systems, RAG & Applied GenAI

Mountain View, CA | +1-408-210-2026 | sumanthpolisetty.sp@gmail.com | [LinkedIn](#) | [GitHub](#) | [Substack](#) | [Portfolio](#)

SUMMARY

AI Engineer and Data Scientist with 7+ years building production agentic and RAG systems for enterprise environments. Architected multi-agent workflows (LangGraph, AWS Bedrock, Model Context Protocol) that cut a month-end financial close process by 90%, from days to two hours. Built and open-sourced an LLM-as-judge platform for evaluating AI engineering candidates in sandboxed, containerized environments. Writes and publishes original technical analysis on agent architecture, embeddings, and evaluation design.

TECHNICAL SKILLS

Agentic & GenAI: Agentic RAG, Multi-Agent Systems, LangGraph, Model Context Protocol (MCP), AWS Bedrock, AgentCore, LLM-as-Judge, OpenAI, Claude, LangChain, Cohere

MLOps & Cloud: AWS (SageMaker, Lambda, OpenSearch, ECS, ECR), Azure (AKS, AI Foundry, Cognitive Search, Azure OpenAI), Docker, Kubernetes

ML & Data: Python, PyTorch, TensorFlow, Transformers, Hugging Face, Scikit-learn, Vector DBs (FAISS, ChromaDB, OpenSearch)

Engineering: Git, FastAPI, Node.js, TypeScript, JMeter, Postman, Claude Code, Cursor

FEATURED OPEN-SOURCE PROJECT

Oasis AI-Engine — github.com/sumanthp/oasis

- Built an open-source, enterprise-grade platform for assessing AI engineering skills by simulating “broken production” scenarios candidates must resolve using LangGraph, MCP, and RAG in a live sandbox.
- Designed an automated LLM-as-Judge evaluation pipeline (Ollama) with async FastAPI background evaluation and dynamic Docker container orchestration in a fully air-gapped, secure architecture.
- Applies direct experience conducting technical interviews for AI engineering candidates to encode realistic, production-grade failure modes into the assessment design.

PROFESSIONAL EXPERIENCE

Senior Data Scientist (AI Engineer) | Tavant — Client: Twitch (Media & Entertainment) *Jun 2025 – Present*

- Architected and deployed multi-agent workflows using LangGraph and AgentCore on AWS Bedrock, automating the month-end financial close process and cutting cycle time from multiple days to 2 hours (90%+ reduction).
- Led design and implementation of Agentic RAG systems for the Fintech team, directly supporting CFO and finance business workflows.
- Engineered a secure, enterprise-grade Model Context Protocol (MCP) server with remote endpoints to connect payment data across SAP, Coupa, and Tipalti for high-stakes financial operations.
- Implemented Presidio-based PII detection and redaction to harden LLM data handling for compliance in a regulated financial environment.

Data Scientist, GenAI Center of Excellence | Tavant *Jan 2023 – Jun 2025*

- Led GenAI CoE initiatives, architecting multi-agent and RAG solutions for Manufacturing and Mortgage platforms, including enterprise search, chatbot, and triage-based interfaces.
- Designed and shipped ML models for manufacturing and mortgage analytics, improving pricing and predictive decision-making workflows.
- Built and operated MLOps pipelines on Azure Kubernetes Service (AKS) to deploy and monitor production ML models.

Associate Data Scientist | Tavant *Oct 2021 – Dec 2022*

- Developed demand forecasting models using temporal fusion transformers and built anomaly/failure-prediction models on IoT sensor data.
- Designed a semantic search engine on enterprise data using Azure Cognitive Search.

- Built an NLP classification model (FastText + FAISS) across English and Japanese text, plus a keyphrase extraction system.

Software Development Engineer (SDE 2) | McAfee*Aug 2018 – Oct 2021*

- Designed a Unified Identity Platform (OAuth 2.0) centralizing authentication across consumer products and OEM partners, reducing maintenance overhead.
- Optimized REST API performance by 25% and cut backend calls by 50% via AWS Lambda-based serverless functions (Node.js, TypeScript).
- Built a CCPA/GDPR compliance platform (microservices + Windows Service) for user data handling.

WRITING

Published original technical writing on agent architecture, embeddings, and evaluation design at sumanthpolisetty.substack.com, including deep dives on production agent failure modes and applied vector-space engineering.

CERTIFICATIONS & AWARDS

- **Claude Partner Badge: Claude Code** — Anthropic | [Credly](#)
- **Tavant Excellence Award — 2023, 2025** | McAfee Innovation Summit Top 5, Hack The Flag | Winner, McAfee Geekathon (2019)

EDUCATION

B.E., Information Science — BMS College of Engineering, Bengaluru, India | GPA 9.24/10 | Aug 2014 – May 2018
